ATTEMPTED ABDUCTION OF GEN.

SCHUYLER.

During the Revolutionary war the scouting parties of the British, emboldened by the feeble state of the country, and encouraged by the high rewards offered them, were exceedingly active in the securing of influential Americans and conveying them to Canada as prisoners. By strategem, and sometimes by force, they fell upon those persons, marked as their victims and by rapid marches would manage to escape beyond pursuit almost before their outrages would be known. Many of these attempts were successful, while others signally failed. The latter was the case with one of the most andaclous attempts in the securing of Gen. Schuyler's residence was in the

Waltermeyer hastily summoned his followers from the drawing room where they were engaged in plundering the place, and who reluctantly desisted from their work to listen to the orders of their leader. PANAMA.

Washington, D. C.—The Republic of. Panama, which was described in recent news dispatches as experiencing strained relations with the helghboring Republic of Cesta Rica over a disputed boundary, is the subject of the following bulletin issued by the National Geographical Society:

"The Isthmus of Panama, which now almost exactly corresponds to the Republic of Panama, has probably had as many thrills to the square foot as any other section of the earth of similar size. They have ranged from the ignoriant in the country, to the feelings of Balbon as he stood, the first white man to view the waters of the Pacific, and those of the American engineers who saw the completion there of the world's greatest engineering feat, and through it all large tracts of the little country have remained much as they were when Columbus first set foot there in its 22, and happy to find a part of a real continent after seemingly interminable islands, named it Terra Firme."
